

What is the Highest Yielding Row Spacing and Population for This Area? (Irrigated)

Northeast Research and Extension Center

Planting Date: June 8

Variety: Armor GP530

Row Spacing: 7.5" 20" 38"

Plant Population (Approx. seeding rate):

30,000 (10 lbs)

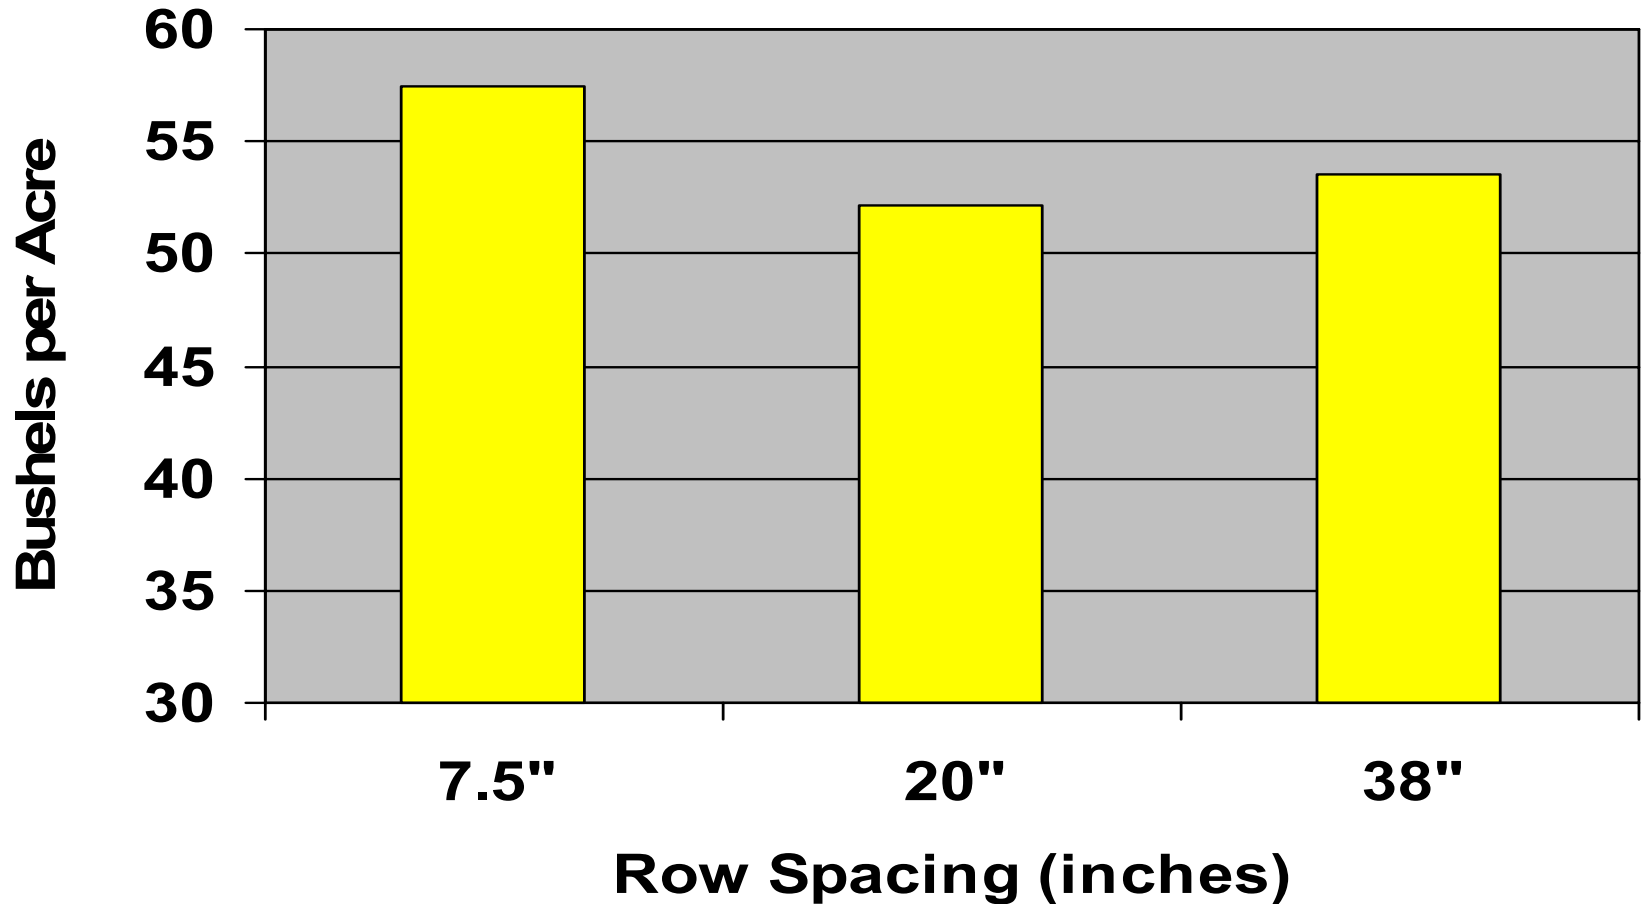

150,000 (50 lbs)

60,000 (20 lbs)

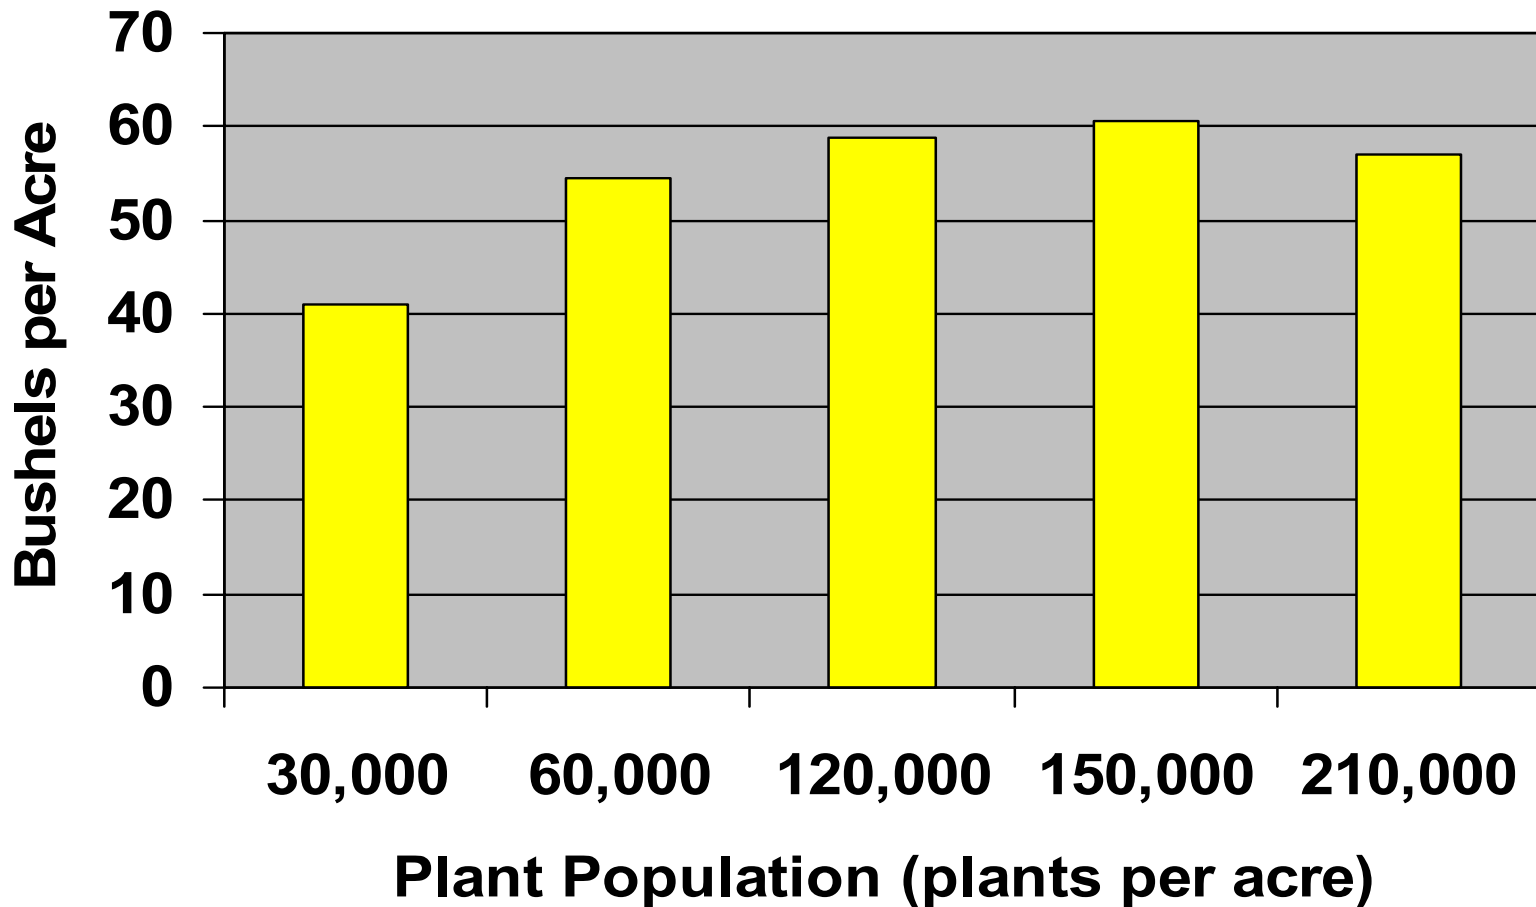

210,000 (70 lbs)

120,000 (40 lbs)

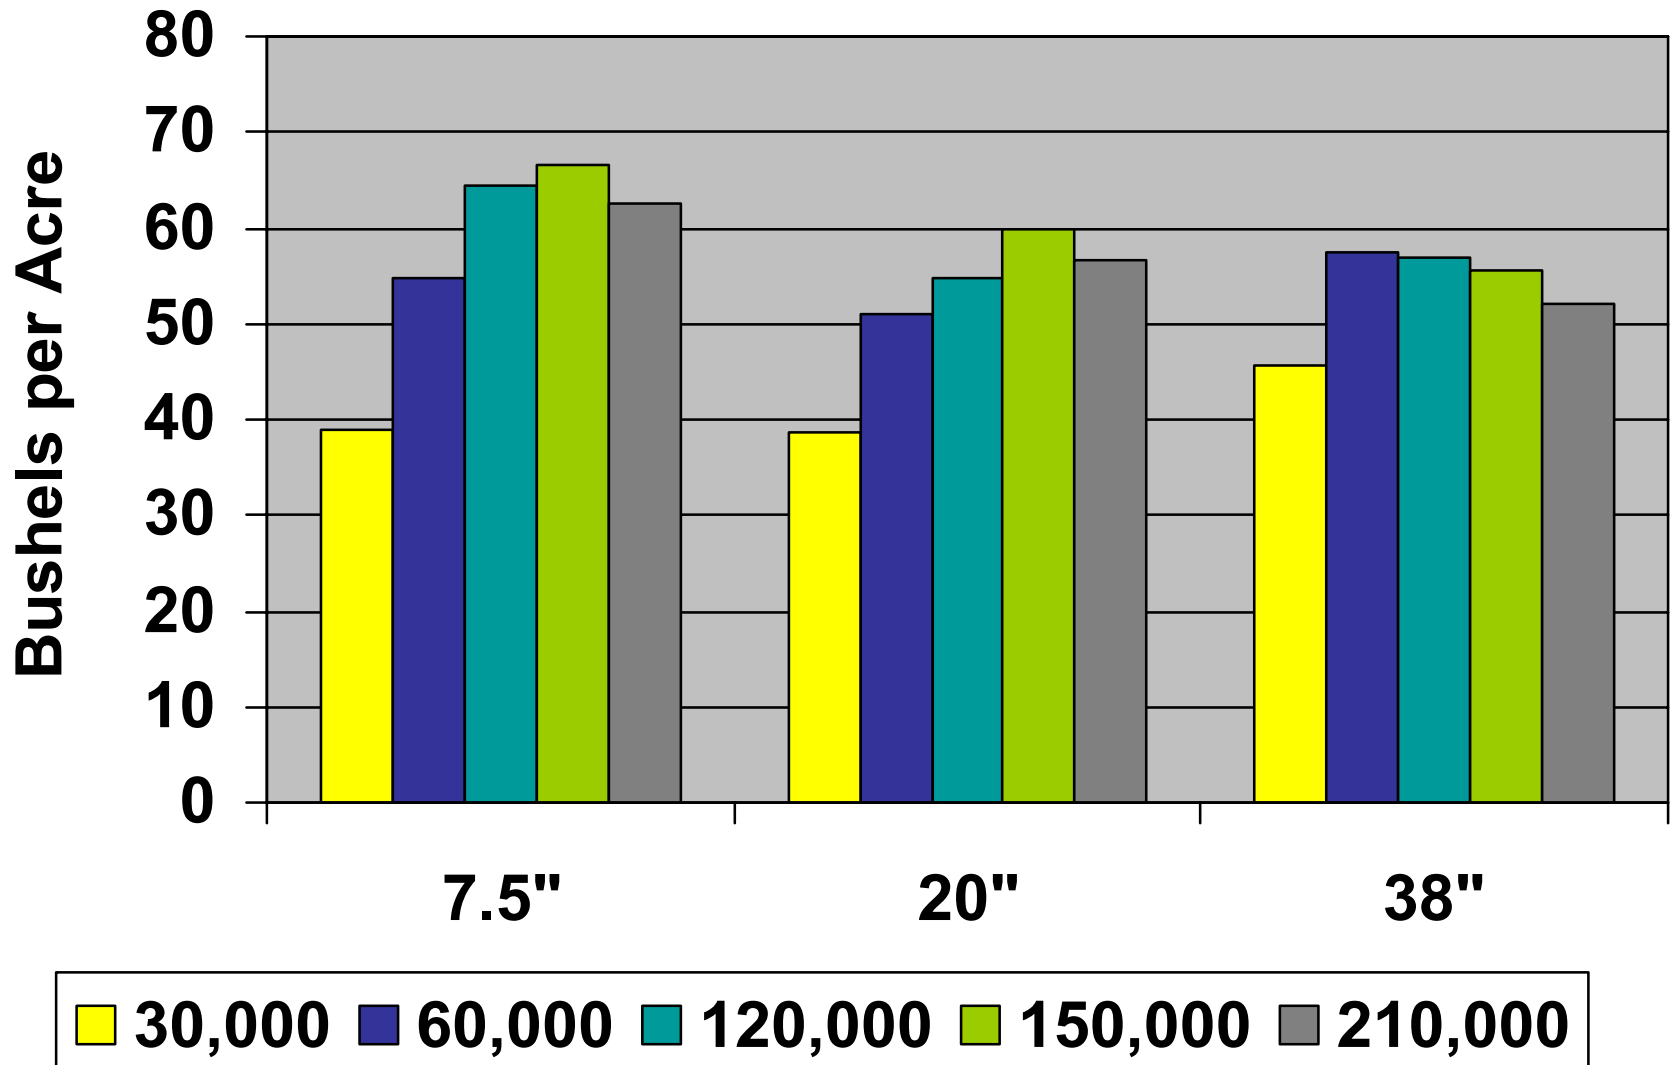

What is the Highest Yielding Row Spacing for This Area? (Irrigated)

What is the Highest Yielding Population for This Area? (Irrigated)

What is the Highest Yielding Row Spacing and Population for This Area? (Irrigated)

Acknowledgements

We are grateful to the Soybean Farmers of Arkansas and the Arkansas Soybean Promotion Board for the combined efforts in support in improving the profitability of soybean production.
